

LYDNEY TOWN COUNCIL

[Adopted]

BIODIVERSITY DUTY POLICY BACKGROUND

INTRODUCTION - STATUTORY DUTY

Under the 2021 Environment Act, public authorities (including town and parish councils) operating in England must consider what they can do to conserve and enhance biodiversity.

Government guidance published on 17 May 2023 clarifies that, as a public authority, town and parish councils must:

- consider what they can do to conserve and enhance biodiversity.
- agree policies and specific objectives based on their consideration.
- act to deliver their policies and achieve their objectives.

Town and parish councils, unlike other authorities, are not obliged to publish a report on their actions, but the [Government guidance](#) requires all public authorities to complete their first consideration of what action to take for biodiversity by 1 January 2024.

They must agree their policies and objectives as soon as possible after this and must reconsider the selected actions within five years of completing their previous consideration, or more frequently if they choose.

To comply with the guidance, town and parish councils could as a minimum:

- **have biodiversity as an agenda item for a meeting before the end of 2023.**
- **note what action they are already taking to conserve and enhance biodiversity.**
- **agree what further steps they should take to conserve and enhance biodiversity.**

Such steps may include:

- reviewing what biodiversity or nature recovery plans are already in place from other local authorities, e.g. potential for jointly-supported wildlife corridors.
- making contact with local voluntary groups working on nature conservation.
- carrying out a biodiversity audit of council landholdings and/or the whole council area, potentially involving residents in a ["BioBlitz"](#)

- gathering expert advice on possible actions in support of biodiversity, such as from [Caring For God's Acre](#) and the [Eco Church initiative](#) in respect of churchyards
- drafting an action plan that covers action that the council will take itself as well as support for the actions of other local bodies.

Whatever action is agreed, as a minimum local council could ensure they address biodiversity concerns when commenting on planning applications.

All these steps may inform an agreed biodiversity policy.

Guidance for town and parish councils on developing a [local nature action plan](#) has been published by South Gloucestershire Council, as well as a [field guide](#) for those with little or no ecological background.

BIODIVERSITY DUTY POLICY GUIDANCE

In accordance with the duty imposed on town and parish councils by Section 40 of the Natural Environment and Rural Communities Act 2006, updated by Section 102 of the Environment Act 2021, Lydney Town Council (hereinafter referred to as the Council) which has any functions exercisable in relation to England must from time to time consider what action the authority can properly take, consistently with the proper exercise of its functions, to further the general biodiversity objective.

This duty also means that Lydney Town Council can spend funds in conserving biodiversity.

DEFINITION

According to Defra (Biodiversity 2020), biodiversity is the variety of all life on Earth.

It includes all species of animals and plants – everything that is alive on our planet. Biodiversity is important for its own sake and has its own intrinsic value.

A number of studies have shown this value also goes further.

Biodiversity is the building block of our 'ecosystems' that in turn provide us with a wide range of goods and services that support our economic and social wellbeing.

These include essentials such as food, fresh water and clean air, but also less obvious services such as protection from natural disasters, regulation of our climate, and purification of our water or pollination of our crops.

Biodiversity also provides important cultural services, enriching our lives.

AIMS AND OBJECTIVES

The object of this policy is to work towards conserving and enhancing the biodiversity of the Council's area.

The Full Council and any committees of the Council will consider sustainability, environmental impact and biodiversity when making decisions and will develop and implement policies and strategies as required.

In particular, the Council will aim to improve the biodiversity of the area in the following ways:

- consider the potential impact on biodiversity represented by planning applications.
- manage its land and property using environmentally friendly practices that will promote biodiversity.
- support local businesses and council operations in the adoption of low impact / nature positive practices.
- encourage and support other organisations within Lydney Town Council to manage their areas of responsibility with biodiversity in mind.
- support residents and local organisation activities to enhance and promote biodiversity.

ACTIONS

Planning applications

The Council will:

- when commenting on planning applications, support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats.
- support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.
- consider what each proposed development might make in terms of biodiversity net gain.
- include policies in support of biodiversity within the neighbourhood plan.

Land and property management

The Council will:

- endeavour to carry out a biodiversity audit of its landholdings.
- consider the conservation and promotion of local biodiversity with regard to the management of its open spaces. This will include adopting beneficial practices with regarding to cutting and removal of vegetation, application of chemicals and timing of maintenance work, paying attention to the Government's [regulations for plant protection products](#)
- take special care in the specification of grounds maintenance contracts to ensure that the work, whilst reaching acceptable standards, does not harm the natural environment.
- endeavour to source sustainable materials when procuring supplies for the Council's use
- endeavour to consider biodiversity issues and the implementation of changes when managing its buildings.

Local community

The Council will:

- raise public awareness of biodiversity issues, including through its website and newsletters.
- engage with local businesses and residents regarding biodiversity in the community and how members of the community can assist and make a difference.
- where feasible, involve the community in biodiversity projects on its land including for example tree planting, wildflower meadows, birdbox making.

Partners

The Council will endeavour to work in partnership with other organisations to protect, promote and enhance biodiversity within the council area.

It will aim to review any local nature recovery strategies, species conservation strategies, or protected site strategies in respect of local Sites of Special Scientific Interest (SSSIs) and consider how it may become more involved in implementing the strategies' recommendations.

MONITORING

This policy will be reviewed every two years or sooner should legislation dictate.

Site / objective	Action	Outcome	Target (years)	Reporting / publicity
Whole council area	Raise local awareness of biodiversity.	Gain local support for action.	Ongoing	Newsletter, social media, website
Protect and support biodiversity	Encourage suitable planting to support biodiversity.	Connect & diversify habitats to meet the needs of a variety of wildlife species	Ongoing	Mapping
Cemetery / churchyard	Additional planting	Increased diversity of habitats and food sources	Ongoing	Newsletter, social media, website
	Adopt a plan to support wildlife and diversity whilst maintaining the site in a way which enables visitors to experience quiet and calm remembrance.	Increased cover for invertebrates, reptiles, amphibians and small mammals.	Ongoing	Newsletter, social media, website
	Leave leaf litter and dead vegetation wherever possible as a habitat for invertebrates.	Encouraging insects particularly butterflies and bees.	Ongoing	Newsletter, social media, website

Council land	Sympathetically maintain hedging.	Food sources and cover	Ongoing	Mapping
	Leave some areas unmown.	Encourages insects	Ongoing	Mapping
	Only use environment friendly pesticides where absolutely necessary and only in ideal weather conditions.	Sustain and enhance natural habitats.	Ongoing	Mapping
Common / other open spaces	Adopt a management plan.	Sustain and enhance natural habitats.	Ongoing	Mapping
	Encourage residents to remove litter and pick up after their dogs.	Protecting habitats	Ongoing	Newsletter, social media, website
	Work with the county council & FoDDC on verge management, favouring biodiversity but noting which areas may need cutting for highway safety.	Protecting/ enhancing habitats	Ongoing	Meetings/ Mapping Newsletter, social media, website
The built landscape	Ensure that planning consultations are considered against the requirements of the Neighbourhood Plan	Protecting/ enhancing habitats	Ongoing	Planning & Highways Committee/ Mapping
	Encourage hedgehog/small animal highways with permeable boundaries	Extending habitats.		Mapping
Increase community awareness of biodiversity	Ask residents for their views on what they would like to be done to conserve biodiversity within the town.	Engagement/ ownership of biodiversity	Ongoing	N'bourhood plan consultation
	Raise awareness of the importance of gardens as habitats for wildlife, with possible actions highlighted in the town magazine.	Promote biodiversity.	Ongoing	Newsletter, social media, website
	Create a page on the town council website for photographs / information / links	Promote biodiversity.	Ongoing	Newsletter, social media, website
			Ongoing	

	Encourage local farmers to contribute.	Promote biodiversity.	Ongoing	Newsletter, social media, website
	Provide seed bombs / bulbs etc. for residents' use.	Extending habitats.		Newsletter, social media, website
	Minimise Floodlighting.	Protect nocturnal animals with minimal external lights on council land	Ongoing	Newsletter, social media, website
Support community projects	Support hedge/tree planting in any appropriate areas.	Extending habitats.	Ongoing	Planning & Highways Committee/ Mapping
	Work in partnership with the community to develop young people's awareness of the environment around them.	Promote biodiversity.	Ongoing	Newsletter, social media, website
	Consider events and offer volunteering opportunities to support biodiversity, working with local organisations.	Promote biodiversity.		Newsletter, social media, website
